

DEPI LMS

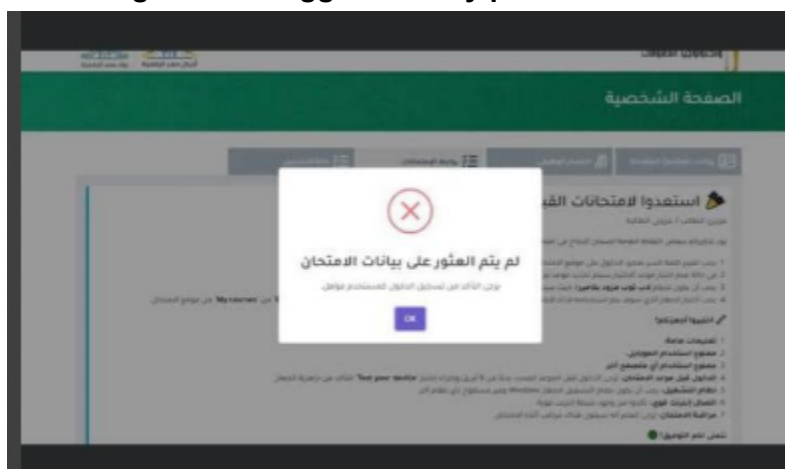

Assessment Exam FAQ

1. Common Questions and Answers

Q1. I did not receive link to exam registration by email

Check your account on the portal. If you do not find it, send email to info@depi.gov.eg

Q2. I got this error message when I logged into my portal account

Please recheck your portal account. Not all exam information are posted at the same time due to the large number of applicants. The exam slot selection is open till April 10th. If you still have problem, send email to info@depi.gov.eg

Q3. I got problems after installing SEB

SEB requires Windows Operating system with recent updates. If installing it from the LMS did not succeed, then you need to perform a complete reinstallation in your machine (See section 2.3).

Alternatively, you can download older version of the SEB from sourceforge using this link https://sourceforge.net/projects/seb/files/seb/SEB_3.7.1/

Q4. I select the exam time but my selection is not shown in my portal account

Selections will be updated on or before April 10th.

Q5. When I logged into my account, there is a message “your exam time is not available”

This is because either you did not select your exam time yet (in this case, follow the steps to login and select it) or your selection is not displayed yet (as in Q3)

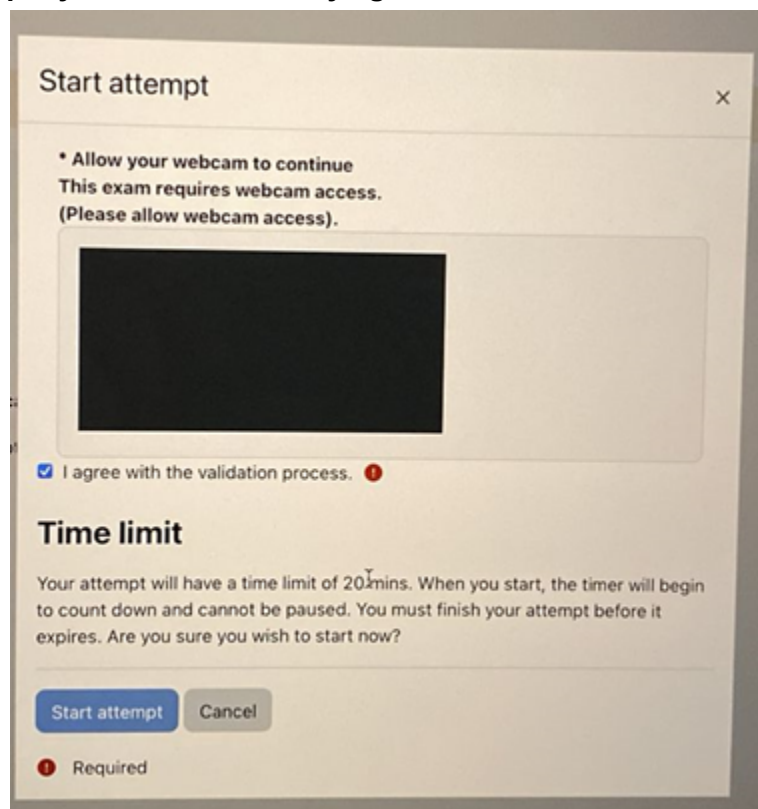

Q6. Can not log into DEPI LMS

Contact support on registration platform

Q7. I did not receive my username and password

Username and password for LMS access will be displayed in your account during the duration of April 6th-8th. If you still did not get them, Please contact support or open ticket on the registration platform

Q8. I tried to setup my camera but I always get black screen

Black camera view means the camera is already in use by another application or another browser tab, or the camera is disabled by your operating system.

Close all browser tabs or any program that may be using the camera.

You must enable or allow the LMS to use the camera from the browser.

Make sure your device has a functional webcam, then test your webcam on the browser first. check one the following links and make sure that it's working properly:

<https://jumpshare.com/webcam-test> Or

<https://www.veed.io/tools/webcam-test>

Q9. I got problems while trying to install Safe Exam Browser “SEB”

SEB requires Windows Operating system with recent updates. If installing it from the LMS did not succeed, then you need to perform a complete reinstallation in your machine (See section 2.3).

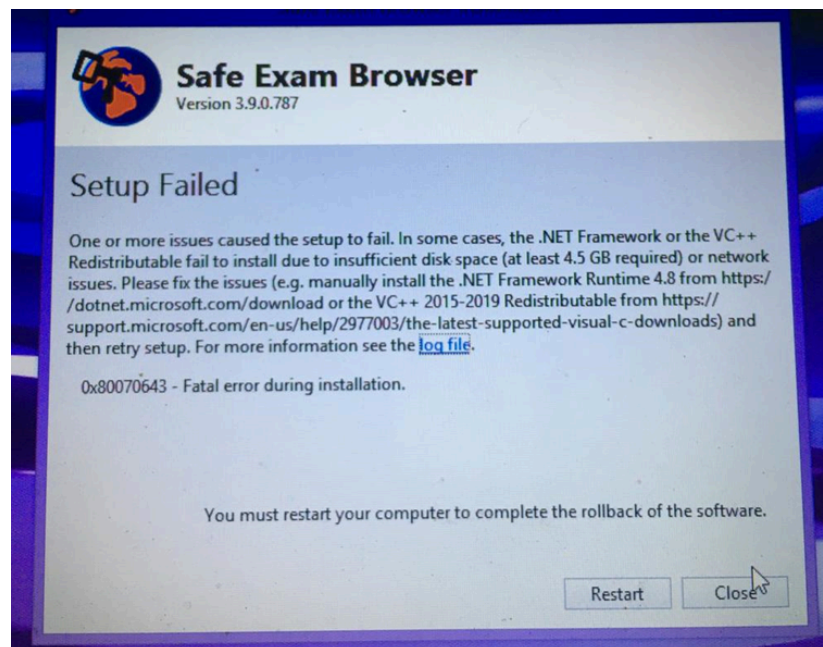

Alternatively, you can download older version of the SEB from sourceforge using this link https://sourceforge.net/projects/seb/files/seb/SEB_3.7.1/

Q10. I want to change the time slot I selected

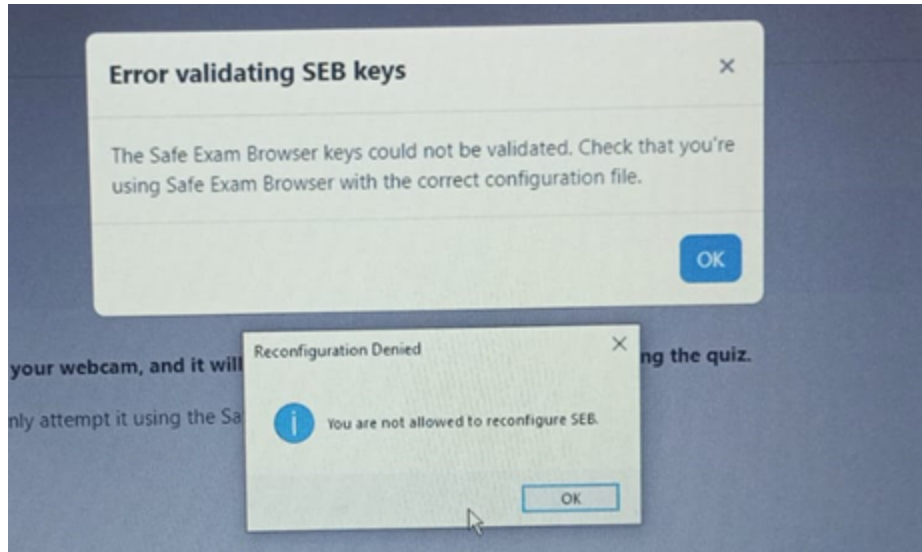

Unfortunately, you can't change time slot after your first selection

Q11. I got this error message after installing Safe exam Browser

One or more of SEB dependencies are missing. Please refer to SEB installation (See section 2.3) or your version of windows is not updated and you should try using older version of SEB

Q12. I got this error message after installing Safe exam Browser

1. Do NOT open SEB manually

- Do **NOT** launch SEB from the desktop icon.
- Always **launch SEB by clicking “Launch Safe Exam Browser” on the quiz page** (from a normal browser like Chrome or Firefox).
 - This automatically loads the correct config file.

2. Make Sure the Correct .seb Configuration File is Used

- The quiz provides a “**Download configuration**” button:
 - Click it and **save the .seb file**
 - Then **double-click the downloaded .seb file** — this opens SEB in secure mode with the right settings.

3. Clear Old SEB Configurations

On **Windows**:

Go to:

makefile

CopyEdit

C:\Users\<your username>\AppData\Local\SafeExamBrowser

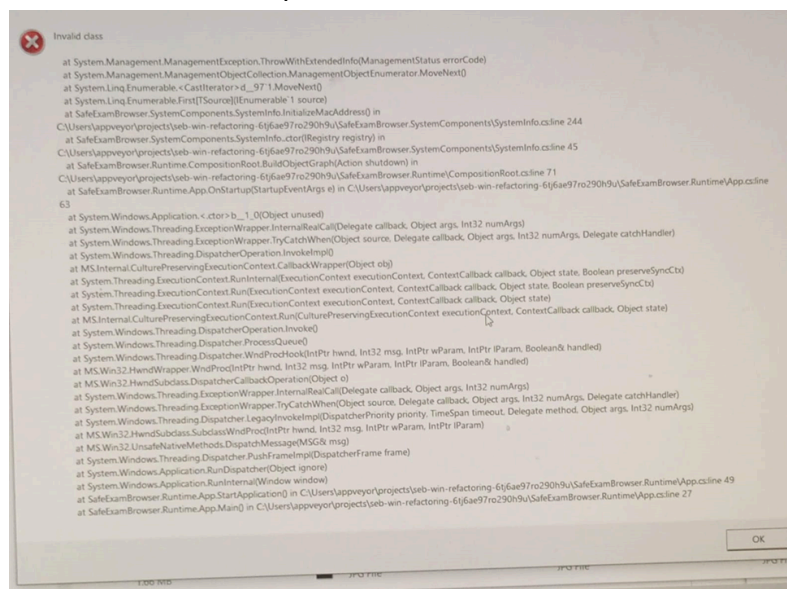

- - Delete any old *.seb config files if present.

✓ 4. Reinstall SEB (Optional but Helpful)

- Uninstall SEB completely
- Re-download the latest version from:
https://safeexambrowser.org/download_en.html
- Install a new installation from scratch
- Then open the new *.seb config file from the quiz

Q13. I got this error message while trying to run SEB

Please refer to Q4 for SEB installation problems.

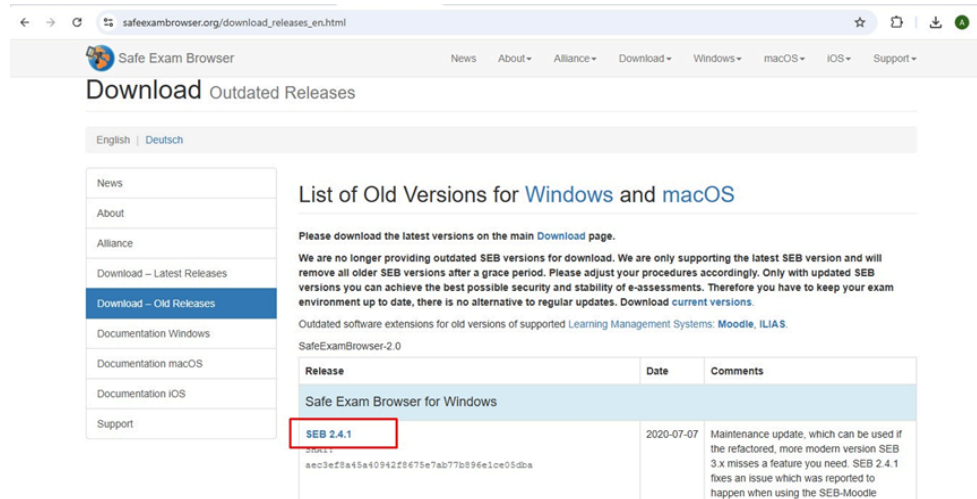

Q14. While preparing for the exam, I downloaded the official Safe Exam Browser (SEB) configuration file from your website. When I open SEB directly using this file, everything works fine — the exam interface loads, the camera activates, and I can proceed without any issues.

However, when I try to launch SEB through Google Chrome using the "Launch Safe Exam Browser" button, the program gets stuck on "Initializing configuration," and then the following message appears

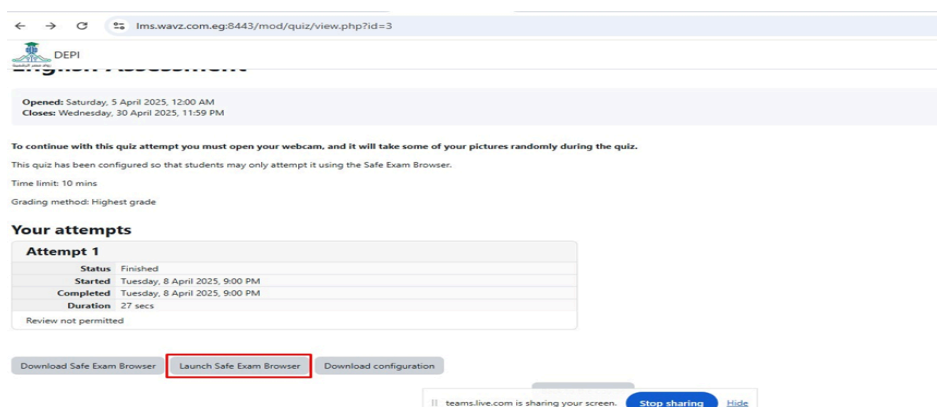

"SEB failed to start a new session! Please consult the log files for more information"

After that, it shows a message indicating that the configuration is not supported?

1. Uninstall this version, download an older version that is compatible with your operating system version and install it.

2. Then, try to launch safe exam browser

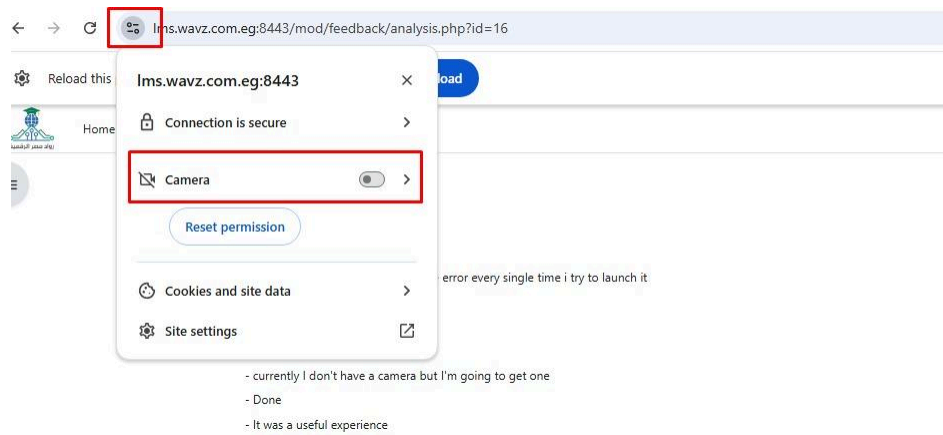

Q15. After installing SEB it kept giving me error every single time I tried to launch it?

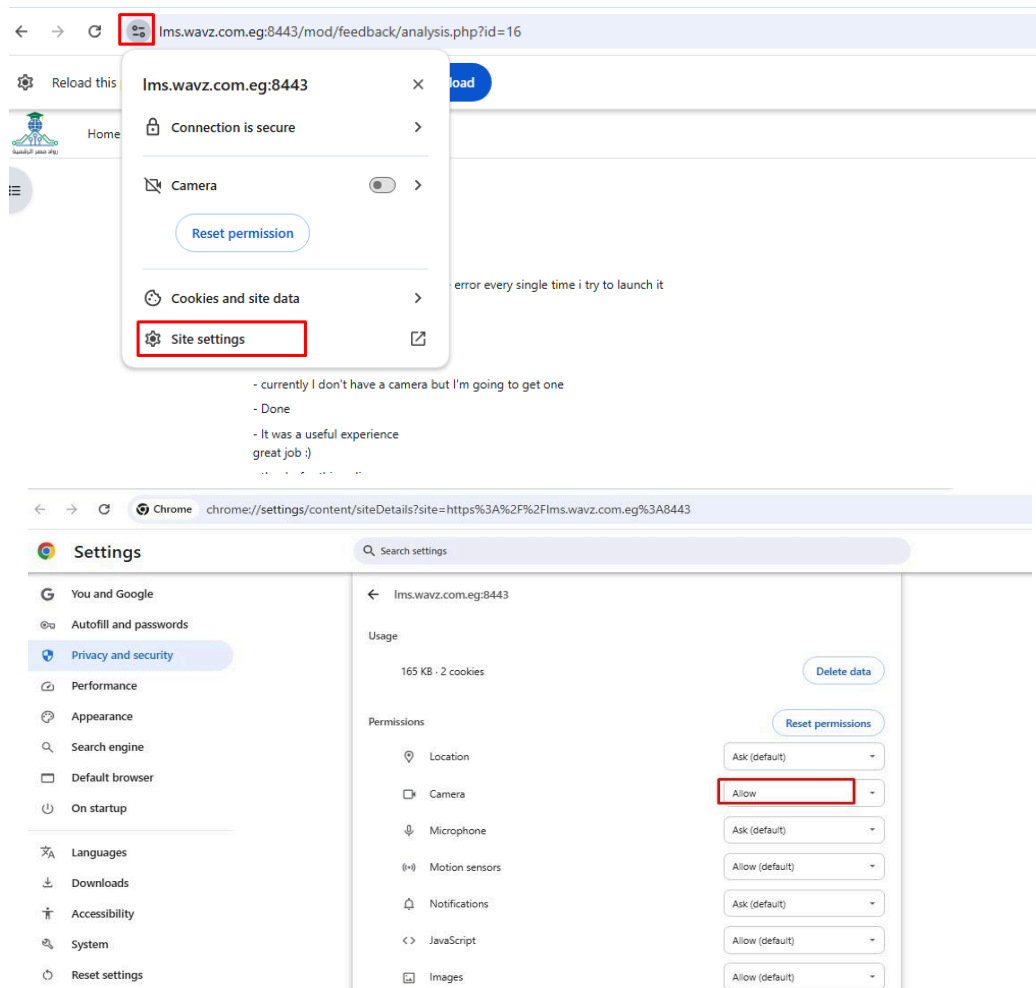

Please refer to Q9 for SEB installation problems.

Q16.I haven't seen any pop up message to allow me to open the camera?

Please allow Camera permission as shown in picture below

Or go to site setting and allow camera for LMS site

Q17. I don't know if the camera opened successfully or not, there was a black square screen on the right while I'm answering the quiz on the safe browser app. How do I know if it has opened successfully or not?

Please refer to Q3

Q18. English

418

If you are the webmaster, configure related parameters on the WAF console to allow your requests.

Access to the DEPI platform is restricted to users inside Egypt.

2. Additional Information

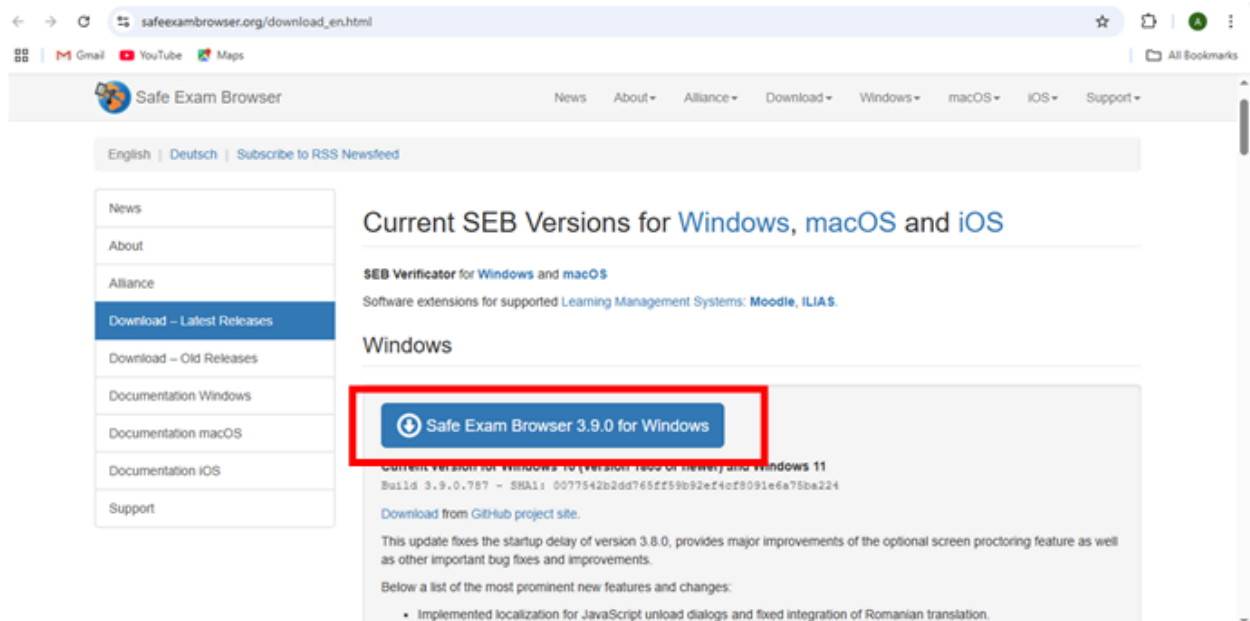

- 2.1. DEPI Round 3 Support information
- 2.2. How to create a ticket from your Platform account
- 2.3. How to perform a complete installation of Safe Exam browser “SEB”

Make sure your Operating System is Windows 10 (Version 1803 or newer) or Windows 11

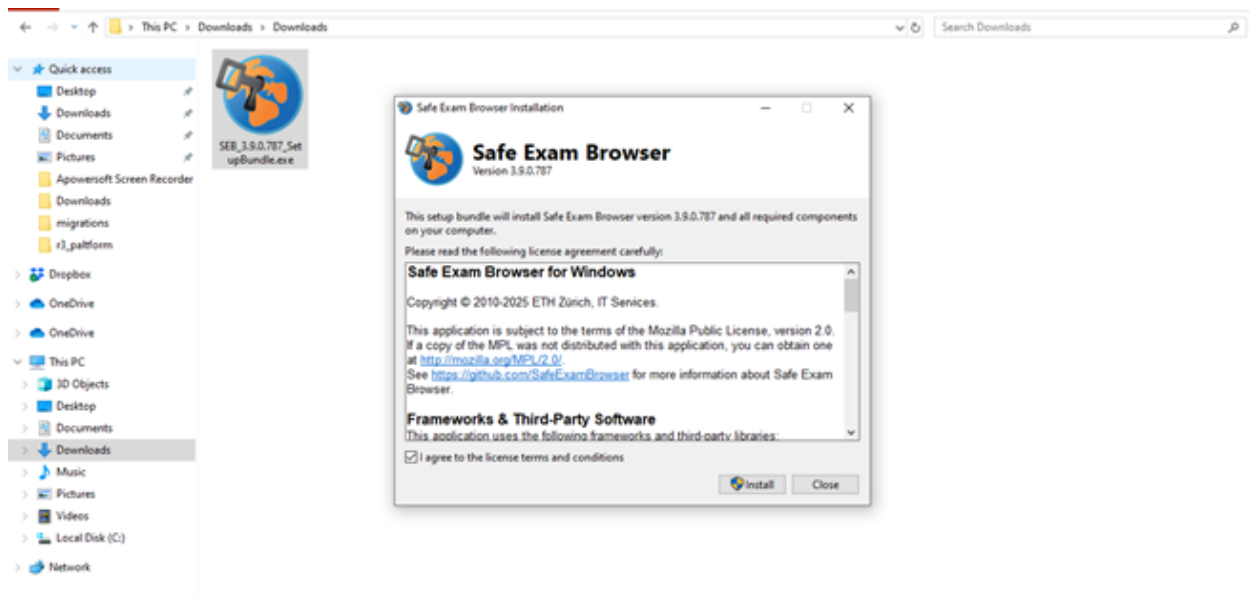

To install Safe Exam Browser (SEB) version 3.9.0.787 on a Windows system, ensure your computer meets the following prerequisites:

1. Operating System: Windows 10 (Version 1803 or newer) or Windows 11.
2. .NET Framework: .NET Framework Runtime 4.8.
 - a. <https://dotnet.microsoft.com/en-us/download/dotnet-framework/net48>
3. Visual C++ Redistributable: Microsoft Visual C++ 2015-2019 Redistributable.
 - a. <https://learn.microsoft.com/en-us/cpp/windows/latest-supported-vc-redist?view=msvc-170#visual-studio-2015-2017-2019-and-2022>
4. Disk Space: At least 4.5 GB of free disk space.

Re-download the latest SEB version from: https://safeexambrowser.org/download_en.html

Install SEB after the download ends. Agree to the terms and then press "Install"

Click on "Close" and then go back to the exam page on the platform
